

Connect Youth With Municipalities For  
**GREEN CITIES**

# INTRO

## Sustainable Green Cities

“Sustainable Green Cities (Smart City 3.0)” project looks at how youth participation can help make cities more eco-friendly, resilient, and thriving places to live. As the world deals with issues like rapid urbanization and climate change, it’s essential to get the next generation involved in making the cities of the future. In this project, we’ll explore innovative strategies that unlock the potential of young minds, empower them to take charge of their future and contribute to the development of sustainable green cities. Learn about today’s youth’s important role in making the environment more sustainable, bringing people together, and promoting smart urban planning. If you like cities, are an activist for the environment, or are just interested in reading, join us on this exciting journey to make our cities living, breathing examples of sustainable development.

### What we are doing:

- **COLLECTING GOOD PRACTICES:** all the partners collected examples of good, environmentally friendly practices that can be an inspiration for other municipalities all over Europe (and outside) to reproduce! You can find all the [good practices here](#)
- **INTERVIEWS:** we are collecting interviews with young people and experts on green cities to collect data about the current situation of different cities in Europe and what to do to improve it. We are also creating a European network of young people who are environmentally conscious and would like to share their ideas!
- **TRAININGS ONLINE:** we deliver online training about KA1 Writing Proposals, to teach the young generations how to write and submit a project under the Erasmus+ call.

Connect Youth With Municipalities For  
**GREEN CITIES**

- **WRITING CONTEST:** all partners have already held the first Writing Contest about Green Cities and environmental-related topics. All contestants had the opportunity to share their visionary ideas using creative writing and winners got awarded during an online ceremony. The second contest will start soon: this time, the topic will be "Green Solutions to Local Problems". It will be focused on researching environmentally good practices to reproduce around the world, and it will be held in all the partners' countries. Amazing awards are waiting for you to win the contest, stay tuned to participate!
- **DISCUSSIONS WITH MUNICIPALITIES:** a proto persona for each country will be selected among the participants of the interviews, and they will have the chance to participate to a discussion with the supporting NGOs and municipalities of their country to share innovative ideas and expectation on how to make Europe a greener place!
- **VOLUNTEERING WEBINARS:** we will deliver two webinars about "Volunteering" and "Active Citizenship". Discover the transformative potential of volunteering and its role in promoting social cohesion and community development, as well as the advantages of active citizenship for communities.

**If you are interested to participate  
in any of our activities, please contact us:**
