

INTRO

Sustainable Green Cities

“Sustainable Green Cities (Smart City 3.0)” project looks at how youth participation can help make cities more eco-friendly, resilient, and thriving places to live. As the world deals with issues like rapid urbanization and climate change, it’s essential to get the next generation involved in making the cities of the future. In this project, we’ll explore innovative strategies that unlock the potential of young minds, empower them to take charge of their future and contribute to the development of sustainable green cities. Learn about today’s youth’s important role in making the environment more sustainable, bringing people together, and promoting smart urban planning. If you like cities, are an activist for the environment, or are just interested in reading, join us on this exciting journey to make our cities living, breathing examples of sustainable development.

What we are doing:

- **TPM IN ATHENS:** All partners met in June in Athens, Greece, for the second Transnational Partner Meeting of the project. There, we discussed the future of the project, division of tasks and next steps to take.
- **DISCUSSION WITH EXPERTS, YOUNG PEOPLE AND MUNICIPALITIES:** after collecting interviews from experts and young people, each partner held a meeting with proto-personas and local Municipalities to finalize the module structure of the training platform that will launch soon!
- **WEBINARS:** all partners have conducted webinars with young people about Volunteering and Active Citizenship.

Connect Youth With Municipalities For

GREEN CITIES

- **WRITING CONTEST:** all partners are implementing the second Writing & Video Contest about Green Cities. The topic is: "Green Solutions to Local Problems". Young people participating are requested to research a green problem in their community and propose a GreenTech solution, expressing themselves both with writing and videos. Amazing awards are waiting for you to win the contest, check our website to participate! **DEADLINE: 31/01/2024!**
- **ONLINE TRAININGS:** we are delivering online training on KA1 Writing Proposals, to teach the young generations how to write and submit a project under the Erasmus+ call.
- **TRAINING PLATFORM:** we are creating an online training platform with interactive activities to get to know the topics of Green Cities and Smart Cities. Stay tuned, it will be launched soon!

If you are interested to participate in any of our activities, please contact us:
